

# Football and Rugby Pitch Renovations

Sportsturf  
Maintenance Services

Vertidrain

Shockwave

We also supply  
and install  
football and rugby  
goals throughout  
Scotland

After winter play, pitches require maintenance during the closed season.

We can carry out maintenance work to bring pitches back to standard for the following season.

We have a large range of machinery for aeration, top dressing, fertilising, overseeding and spraying of selective weedkiller and liquid fertiliser

Top Dressing

Please contact us for a site visit and report, or a quote

## Granular Fertilising

*Supply and application of fertiliser*

*Our Sportsturf Consultant can advise which fertiliser is required for your pitches*

**With over 50 years experience of maintaining sports surfaces, McNab Sport can help you look after your natural turf and synthetic sport surfaces. We supply all products such as fertilisers, grass seed, herbicides and pesticides, required to maintain a healthy sward**

## Spraying

*Tractor mounted selective weedkiller or liquid fertiliser, by using GPS mapping in the cab, we can be accurate to 200mm on application*

## Overseeding

*Overseeding pitches either 2 or 3 ways*

*For more information on our turf services and view videos about our range of services, please go to our website or youtube channel*

*(select Playlists, to view specific videos about natural turf, synthetic surfaces, cleaning, thermal markings)*
